## JOB OBJECTIVE

I am a bilingual Front End developer and Full Stack Development student with +2 years of experience and a strong passion for creating impactful digital experiences. I am actively seeking a challenging position that will leverage my knowledge, hard and soft skills, and provide me with opportunities to learn and grow both personally and professionally. I am eager to join a dynamic company where I can contribute my expertise in building digital products and collaborate with a talented team that nourishes my experience and abilities.

## WORK EXPERIENCE

### 2021 Axyoma Global - Marketing Agency

Front End Developer

- Successfully crafted visually appealing and user-friendly webpage layouts.
- Proactively maintained and optimized websites front-end, ensuring seamless functionality and responsiveness.
- Implemented effective documentation strategies, resulting in enhanced team collaboration.
- Conducted thorough manual testing and troubleshooting, created bug reports promptly identifying resolving issues to deliver high-quality and error-free web solutions.

### 2018 Freelance

Private English lessons

- Developed lesson plans, focusing on improving English language proficiency and fluency in speaking.
- Monitored students' progress and provided constructive feedback to guide their language learning journey effectively.
